Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of the restriction between groups I and II in the reply filed on June 18, 2007 is acknowledged. The traversal is found persuasive and the requirement for restriction is withdrawn. Therefore, all claims will receive an action on the merits.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto (JP 2000/211655 A) in view of Yoshioka (JP 11301696 A). Yamamoto discloses a self standing bag (1) with a spout (Fig 2, 30) at the upper portion of the bag and welded edges (2a). Yamamoto does not disclose the edges having a sealer made of thermoplastic resin and integrally molded with the spout. Yoshioka discloses a bag (Fig 1, 11) having a spout (13) and an edge sealer (14) integrally injection molded ([0020]) in order to improve the sealing properties of the bag seam ([0019]). Therefore it would have been obvious to one of ordinary skill in the art at the time of invention to create the self-standing bag of Yamamoto with edge sealers integrally molded to the

spout as taught by Yoshioka in order to improve the sealing properties of the bag seams.

In regards to claim 4, Yoshioka discloses an alternative design (Fig 3) where the edge sealer (22, 24, 25) is integrally molded with the spout (23) (See top section) but molded in two steps, one half at a time, the two parts together forming the edge sealer.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Satoshi et al. (US 3,363,039), Friedman (US 3,362,302) and Hoffman (US 3,956,045).

4. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
